

# Live Classroom Environment

Students and teachers learn together at the same time.

## Your classroom based learning will involve:

- live Zoom video conferences with teacher presentations, pair and small group activities, and individual guidance.
- a rich variety of activities hosted in the Moodle learning management system, chosen, guided and monitored by the class teacher
- other e-learning materials and platforms selected according to student needs and preferences.
- grammar, vocabulary, pronunciation and skills work, with specialised content for specific courses

# Guided Individual Learning

You will engage in a range of educational interactions based on your learning needs and goals and at flexible times that suits your lifestyle.

## Your learning will include:

- controlled practice exercises to reinforce and extend synchronous learning
- reading, listening, speaking and writing exercises
- formative and summative assessment to check your learning progress and proficiency
- small-group project teams
- learning skills development

# One-to-One Consultations

Included in your online course is the opportunity for scheduled one-to-one interaction between you and your teacher each week.

## You will discuss:

- individual learning plans
- progress reviews
- educational and welfare counselling
- assistance with priority and problem areas
- individual study recommendations
- advice on future careers and tertiary education
